ATHENA GTX IS COMMITTED TO BRINGING OUR CUSTOMERS THE BEST QUALITY AND MOST CURRENT PRODUCTS TO MEET THEIR NEEDS.

WVSM WEARABLE TACTICAL KIT

Tactical Pac is an adaptable MOLLE pouch specifically designed to hold two WVSM monitors and all accessories, including an ADMS (Athena Device Management Suite) compatible smart device. The small size and light weight of the WVSM® (Wireless Vital Signs Monitor) makes it one of the most portable FDA cleared medical monitors on the market. Tactical Pac further enhances this capability by placing two WVSM monitors and peripherals directly at hand, in any scenario. With WVSM and Tactical Pac you can now monitor multiple patients, anywhere, at any time.

MOBILIZED SOLUTION

The WVSM® Tactical Pac is designed to bring automated, multi-patient monitoring capability wherever you go in a lightweight, modular package.

Removable leg straps allow Tactical Pac to be strapped to a pack, vest, or thigh.

TACPAC IS AVAILABLE IN ORANGE

- Two WVSM monitors with peripherals (Measuring NIBP, HR/PR, SpO2, and ECG)
- Optional centralized monitoring device
